# 2024-Model_View_Delegate--零声教育

一、Model（模型）

InterView 框架中所有模型都基于抽象基类 QAbstractItemModel 类，此类由：

QAbstractListModel ； QAbstractTableModel 和 QAbstractProxyModel 类继承。

Qt 所提供参考如下：

Interview

This example demonstrates the usage of the model/view framework.

Files:
- itemviews/interview/interview.pro
- itemviews/interview/interview.qrc
- itemviews/interview/main.cpp
- itemviews/interview/model.cpp
- itemviews/interview/model.h

Images:
- itemviews/interview/images/folder.png
- itemviews/interview/images/interview.png
- itemviews/interview/images/services.png

二、View（视图）

InterView 框架中的所有视图都基于抽象基类 QAbstractItemView 类，此类由 QColumnView、QHeaderView、QListView、QTableView 和 QTreeView 类继承。

Qt 所提供参考如下：

QAbstractItemView Class

The QAbstractItemView class provides the basic functionality for item view classes. More...

Header: #include <QAbstractItemView>

qmake: QT += widgets

Inherits: QAbstractScrollArea

Inherited By: QColumnView, QHeaderView, QListView, QTableView, and QTreeView

- List of all members, including inherited members
- Obsolete members

三、Delegate（代理）

InterView 框架中的所有代理都基于抽象基类 QAbstractItemDelegate 类，

此类由 QItemDelegate 和 QStyledItemDelegate 类继承。

Qt 所提供参考如下：

QAbstractItemDelegate Class

The QAbstractItemDelegate class is used to display and edit data items from a model. More...

Header:	#include <QAbstractItemDelegate>
qmake:	QT += widgets
Inherits:	QObject
Inherited By:	QItemDelegate and QStyledItemDelegate

- List of all members, including inherited members
- Obsolete members
